

CS310 COMMERCIAL SKI TRAINER

HIGHLIGHTS

ZYMFIT CS310 ski trainer is a more economical ski trainer that offers a joint-friendly full-body workout, so you can get the amazing workout of cross-country skiing. Our CS310 ski trainer is easily adapted to those with lower body limitations or injuries and will deliver complete cardiovascular training, working your core and upper body from a seated position, whether from a stool, chair or wheelchair.

The CS310 can be either mounted on a wall or used with a floor stand. Wall mounting provides the most compact option, while the floor stand, with its anti-skid deck and caster wheels, provides an all-in-one solution that makes the CS310 mobile. Either way, the CS310 ski trainer is easy to assemble, and we provide all the tools you'll need to do the job.
